The Model 15 is a rugged, precision weld head with low radial and axial clearance for GTAW welding of all pipe sizes from 3 inch (76 mm) OD pipe up to an unlimited size, including flat plate. It is primarily designed for field use where exceptional weld quality and consistent results are required.

The Model 15 features rotation, wire feed, automatic voltage control, cross-seam steering and torch oscillation. It is available in many standard configurations, and can be retro-fitted or customized with numerous application-specific accessories to accommodate almost every need.

The Model 15 is just one element of an automated pipe welding system. Combine with a torch assembly, precision guide rings, AMI power supply, and other options to configure a complete system suitable for your specific welding application.

**AVC Stroke**
1.75" (44 mm)

**Torch Oscillation Stroke**
1" (25.4 mm) maximum

**Tungsten Size**
3/32", 1/8" or 5/32" (2.3 mm, 3.2 mm, or 4 mm Ø)

**Filler Wire**
0.020" - 0.045" (0.5 mm or 1.1 mm Ø)

**Wire Feed Speed**
5 - 200 IPM

**Travel Speeds**
0.1 - 20 RPM

**Wire Spool**
2 lbs. or 4" Ø standard spool (1 kg or 100 mm Ø spool)

**Weight with “A” Torch**
18 lbs. (less cables) (8 kg)

**OD Range**
3" - flat (76.2 mm — flat)

**ID Range**
18" or larger (457 mm to larger) (adapter required)

**Torch**
Water-cooled, 300 A DC 100% Duty Cycle

**Quick Specs**
- Single or dual wire feeder options
- Special options are available
- Compatible Power Supplies: M227 and M415

STANDARD TORCH FEATURES

- Cross-seam torch tilt (in/out).
- Electrode-to-wire nozzle height adjustment.
- Wire nozzle cross-seam adjustment.
- Lead/lag adjustment.
- Wire nozzle entry angle adjustment.
- Wide variety of gas cups and gas lenses.
- Spring-loaded mount to prevent accidental breakage of torch parts.
